- Programs: Akuna Capital Options 101. Roles: Undergraduate Econometrics & Microeconomics Teaching Assistant (Feb 2023 – May 2026).

WORK EXPERIENCE

HSBC

Hong Kong, SAR

Global Markets Summer Analyst / Wealth Solutions & Structured Credit Trading

06/2026 – 08/2026

- Developed an Excel-based credit-derivatives pricing project emulating core Bloomberg SWPM and CDSW functionality, including KRW swap-curve bootstrapping, interest-rate swap valuation, tenor-based DV01 hedge analytics, CDS pricing, and First-to-Default basket modelling.
- Engineered a dynamic BQL-enabled Excel comparables framework to evaluate Credit-Linked Notes against reference cash and callable bonds, incorporating instrument-specific eligibility constraints and relative-value metrics.
- Produced client-facing marketing materials for structured-product solutions and automated term sheets for Zero Callable Linear Notes using JavaScript and CSS, supporting Wealth Solutions coverage of institutional and private-bank clients.

Challenger Investment Management

Sydney, Australia

Summer Analyst (ALM & Liquids, Credit)

11/2024 – 02/2025

- Delivered credit assessments on private and unrated fixed-income issuers across IG and HY, as measured by integration into investment memos and internal risk scoring adopted by portfolio managers, by applying Moody's methodology.
- Developed and proposed a delta-neutral crypto basis strategy yielding ~9% annualized returns at a 1.4 Sharpe ratio, as measured by a comprehensive execution and risk management framework adopted by the desk, through quantitative modeling of term-structure dynamics, slippage, and historical drawdown constraints.
- Strengthened ALM monitoring across mortgage trailing-interest and life-insurance portfolios, as measured by stress reports adopted into desk reporting cycles, by building cashflow projection models and running base-case versus worst-case rate and credit-spread shock scenarios calibrated to historical drawdowns.

Wellington Management

Sydney, Australia

InvesTech Intern

03/2024 – 10/2024

- Safeguarded options and futures market data feeding downstream pricing, risk, and trading analytics, as measured by data breaks identified and remediated across the feed, by running Bloomberg Terminal-based QA on bid/ask quotes, contract specifications, and underlying linkage checks.
- Built a systematic FX pairs screening framework across G10 and EM crosses, as measured by adoption into different PM's pair-selection workflow for relative-value trades, by implementing a cointegration matrix and the Cointegrated Augmented Dickey-Fuller (CADF) test across FX and commodities.
- Delivered a *firm-wide recognized* investment memo automation tool with sentiment analysis, as measured by ~20% reduction in analyst drafting time and presentation to Directors/Board, by architecting a Retrieval-Augmented Generation (RAG) pipeline over the firm's internal research archive.

SKILLS & ADDITIONAL INFORMATION

Computer: Microsoft Office, Tableau, FactSet, Capital IQ, Bloomberg Terminal, R, Python, Java

Extracurricular Activities: UNSW Personal Investment Society (Vice President Externals), Taiwanese Student's Association (Director)

Languages: English (Native), Mandarin (Native), Cantonese (Fluent)

Interests: Skiing, Basketball, Chess, Hiking, Travelling
